## **Administrative Regulation**

### **All Personnel**

All new employees must provide proof that they have had a tuberculosis examination within sixty days of employment. All employees are required to undergo a tuberculosis examination every four years or more often if directed by the Governing Board. This examination shall consist of an intradermal Mantoux PPD skin test, which if positive, shall be followed by an x-ray of the lungs.

The skin test will be provided to employees by the ROP nursing staff at no cost. The ROP shall not pay for either an x-ray or skin test done elsewhere. If an employee tests positive and requires an x-ray, the ROP shall reimburse the employee for having an x-ray done by an ROP approved health care provider.
