Policy

Instruction

The Board of Trustees affirms the importance of providing all students with quality instruction designed to teach life skills that demonstrate the value of work and lead to employment or prepares students for advanced training for employment.

Collaborative planning with staff, district, community, and industry representatives is necessary to identify school and community needs. This collaboration supports well-coordinated instructional programs that reflect industry standards and practices.

Revised: November 13, 1996
Adopted: December 18, 1979
